

HOW TO CREATE HALLOWEEN HANGING SPIDER WEBS

WHAT YOU NEED:

- ☆ 6 x Plastic spiders
- ☆ 1 x Balloon
- ☆ String
- ☆ Scissors
- ☆ Glue
- ☆ White spray paint
- ☆ Disposable Cup
- ☆ Disposable Bowl

STEP ONE

Blow up balloon to the size you would like and then place onto a bowl
Cut the string into 1m long pieces then pour the glue into a disposable cup

STEP TWO

One at a time, dip a piece of string in the glue until completely covered. Squeeze off the excess glue and start wrapping the pieces around the balloon in different directions until they are at least one inch apart.
(Try to hide the ends of the sting by placing them against each other)

STEP THREE

Pop the balloon and pull it away using the gaps.
You can now spray paint your balloon white to give a webbed look.
Finally, glue the plastic spiders onto the string. Attach some string or wire to the top of the orb to enable you to hang it!
